### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 is indefinite as being incomplete for omitting essential structural cooperative relationships of elements between the well plug, the packer element, the locking device, the operating means, the anchoring device, and the link connection such omission amounting to a gap between the necessary structural connections. As a result the step of radially expanding the packer element is confusing, since it is not clear which mechanical part(s) actually contributes to the expansion of the packer element.

Claim 4 is indefinite as being incomplete for omitting essential structural cooperative relationships of elements between the well plug, the packer element such omission amounting to a gap between the necessary structural connections, as it is unclear whether the well plug comprises the packer element. The language "the upper supporting surface forms an approximately tight mechanical barrier" is indefinite.

Claim 9 is confusing, since the language "curved end surface in the end opposite to the end" is confusing, because "an end" can not be opposite to itself.

Claim 16, the language "wherein the securing device is pushed against the securing device" is confusing.

***Allowable Subject Matter***

Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Barker et al'356, Bloom et al '894, and Luke '150 all show well plugs or packers having anchoring means.
